1924.

1 TAXES, DUTIES, FEES AND OTHER SOURCES OF REVENUE.

AD VALOREM ON ALL GOODS NOT SPECIFICALLY CHARGED WITH DUTY.

1st & 2nd Schedules : Ordinance 29 of 1923.

4—(1.) The cost of goods, for the purpose of ascertaining the amount of the *ad valorem* duty payable thereon shall be calculated, if the goods have been purchased by the importer or consignor thereof, on the price charged for the said goods by the vendor thereof as verified by the genuine invoice of such goods and if procured otherwise than by *bona fide* purchase, calculated on the actual market value or wholesale price of such goods at the time of exportation to this Colony in the principal markets of the country whence such goods were imported: Provided always that the Comptroller or the proper Officer of Customs is satisfied in the case of goods alleged to be purchased of the fact of purchase, that the entries in such invoice are true, and that the invoice is genuine in every particular, and also in the case of such goods or of goods obtained otherwise than by purchase that the price charged for the said goods as represented by the invoice aforesaid or by the entry appears to be a fair market value for such goods, at the place, and at the time that the same were purchased by the importer or consignor thereof.

(2.) No discounts or deductions from the value of any goods chargeable with *ad valorem* duty shall be allowed unless such discount or deduction be clearly shown to the satisfaction of the Comptroller or other proper officer on the original invoice or unless the same be verified by the signature of the manufacturer, merchant, or person from whom the goods set forth or described in the invoice were purchased, and by whom such discount or deduction has been or purports to have been actually allowed.

(1) Exclusive of area granted for mining purposes. (2) Includes 104 acres granted free to returned soldiers. (3) Includes office and survey fees and rent from leases and licences. (4) Balata Licences give only the right of tapping the trees to produce the gum: the areas have therefore not been included.

REMARKS:

11 free grants were made to returned soldiers to be made absolute on the condition of continual beneficial occupation. Grants are sold in lots up to 10 acres each at 10 shillings per acre, plus survey fees and cost of preparing title, which amount to £3.2.6. Agricultural Leases are made for periods up to 99 years at rental of 10 pence per acre, plus survey fees and cost of preparing title. Grazing leases for similar periods at rental of 8 shillings and 4 pence per square mile per annum; cost of survey and preparing title extra. Grazing permissions are renewable annually at a cost of £3.2.6 per annum.

Timber leases are granted for tracts exceeding 5,000 acres for such term, at such rental and subject to such special terms and conditions as may be agreed upon, as to rental, &c., royalty to be paid on all forest products removed. Timber licences are usually for a period of 1 year and are subject, ordinarily, to a rental of 2½d. per acre per annum up to 2,000 acres, and ½d. per acre in excess of 2,000; royalty paid on products removed, and a minimum royalty charge of 10 cents for every acre of land comprised in each Licence is payable.

Balata licences which only permit of tapping of the balata trees extend from 5 to 15 years, annual rental £4.3.4, royalty on gum produced, filing fee with application, £1.13.4.

Bonds are required in connection with all Timber leases and Timber and Balata licences for the due performance of the conditions of the lease and as security against destruction of the forests.

The average utilization of timber from the Crown Forests for 5 years ending 31st Decr., 1924 was 636,063 cubic feet; this includes 138,707 cubic feet exported of which greenheart formed 99.21 per cent. The total home consumption of local and imported timber was 769,787 cubic feet of which greenheart formed 12.78 per cent; this includes 272,431 cubic feet of pine lumber imported from Canada and the United States of America.

For the same period the utilization of the principal forest products from Crown Lands was as follows:—

Article.	Utilization.	Exports.	Home Consumption.
Shingles	No. ... 3,508,321	1,801,670	1,706,651
Fuel, wood	tons... 68,952	6,784	62,168
Charcoal	tons... 4,051	2,599	1,452
Balata	lbs. ... 1,180,010	1,180,010	Nil

No records are available of the production of timber and other articles from private lands consumed in the Colony.

Numerous enquiries continue to be received from outside sources regarding the timber resources of the Colony; but the financial depression has militated against investment of outside capital. A good deal of interest appears to have been aroused in the question of supplies of Mora (*Dimorphandra Mora* or *Mora ex elsa*) for manufacture of railway sleepers: both that wood and Wallaba (*Eperua falcata*) have been proved suitable for the purpose on the local railways and large quantities of Mora sleepers have been shipped to the Barbados Government Railway. Both these woods are obtainable in large quantities. 2,363 labourers were employed in the forests in the timber industry and 3,565 in Balata tapping.

There are 6 power-driven Saw-mills in Georgetown, 4 in New Amsterdam, 1 on the Courantyne River, 1 on Canje River, 1 on Berbice River, 1 on Waini River, N.W.D., and 5 on the Essequibo River and 1, a water-power (Government) Mill at Christianburg on the Demerara River. Four power-driven wood working factories are in Georgetown. A number of saw-pits are located in various districts for cutting up timber by hand-power.

7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

Generally speaking, trade during the year was satisfactory, the principal exports of the Colony showed an all-round increase in volume. For example, the export of rum was doubled and there were also large increase in the molasses, rice, lumber, timber, railway sleepers, copra and balata shipped.

The sugar crop showed an increased yield of 91,782 tons as against 90,758 in 1923. The prices, however, were low and barely exceeded the cost of production. The prospects for 1925 are good.

The position of the Rice industry has improved considerably, the yield being 314,352 bags as compared with 236,440 in the previous year.

The Diamond industry was hampered by adverse weather conditions, the output decreased from 1,141,425 stones weighing 214,474 carats in 1923 to 1,055,425 stones weighing 185,585 carats during the current year.

The production of gold has also diminished due mainly to the fact that the enhanced price of diamonds attracted an appreciable number of those previously employed in gold mining.

The production of timber and other forest products compared as follows with that of the previous year:—

		1923.	1924.

QUESTIONS.	ANSWERS.
I. If the Prison is on a separate system, is the separation complete? And, if not, what is the separation enforced by day and night respectively?	I. None of the Prisons are on the complete separate system. All prisoners are worked in association. Separate Cells are provided for all prisoners in the County Prisons, at Georgetown and New Amsterdam, except in Hospital Association Wards.
II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?	II. All Prisoners when working in association outside the Prison walls are under the sole command and supervision of the Prison Warders, except those at Morawhanna and Kamakusa Prisons, who work under Police supervision. The Public Works Department indicate the work to be done and advise in the execution of it.
III. How many cells are there; and how many associated Wards?	III. At the Penal Settlement there are 306 Cells and a Hospital containing 1 large Ward for Convicts, 1 Warders' Ward and 6 separate Cells. At Georgetown, 246 Cells, 4 Association Wards, 2 Hospital Wards and 2 rooms for Debtors. At New Amsterdam there are 88 Cells and 2 Hospital Wards. At Morawhanna, 4 Cells. At Kamakusa, 7 Cells.
IV. Taking the <i>average</i> number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?	IV. At the Penal Settlement, in Cells 437 cubic feet, in Hospital 1,233 cubic feet; in Georgetown, in Cells and Wards 520 cubic feet, in Hospital 3,564 cubic feet; at New Amsterdam, in Cells and Wards 760 cubic feet, in Hospital 1,696 cubic feet.
And what superficial area?	Penal Settlement 45 square feet; Georgetown Prison 40 square feet; and New Amsterdam Prison 36 square feet.
V. How are the prisoners classified?	V. The English Mark system is in force and is extended to all prisoners sentenced to 12 months' imprisonment and upwards—from July 1st. 1913.
VI. Is penal labour—that is, labour by treadmill, crank or shot drill—in force?	VI. No.
